

Since 1979

# POLYETHYLENE (PE) TRAFFIC CONE

## CHIN LEAN® Polyethylene Traffic Cone

are cone shaped markers that are used to redirect road traffic or footfall in a safe manner and can also warn of hazards. Cones are reflective so that they are visible at night plus they are normally coloured red or orange with white horizontal stripes. Traffic cones are durable and designed to withstand all weather conditions plus the base of the cone is weighted to ensure it remains upright and stationary.

### ADVANTAGES

- # Long life span
- # Cost effective
- # UV protected
- # Lightweight
- # No heavy equipment needed.
- # Fast and easy to assemble & dismantle

### PRODUCT FUNCTION

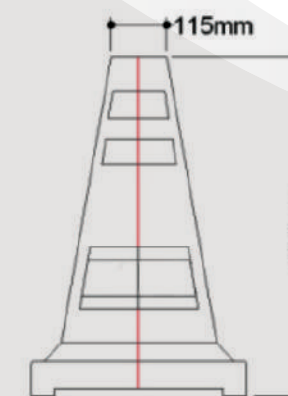

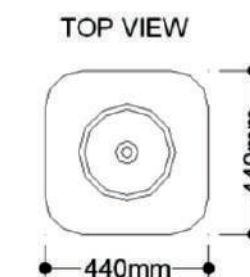

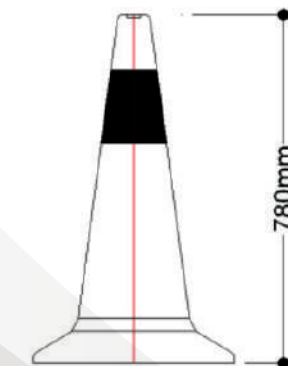

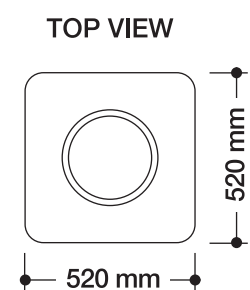

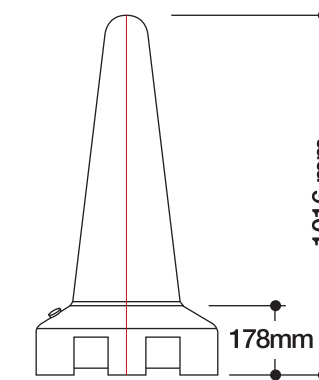

Highly visible – excellent at night and on dark days. Red or orange with white reflective stripes warn of hazards and dangers, road works, road lane changes, redirect traffic, road accidents. Used on footpaths, pedestrian areas and constriction areas warning of danger and hazards or used to designate safe areas for children playing.
